Compact ZERO1

◇Well requested Negative camber spec for Compact series now will be released. To install this, Front camber is attached on fitting hole of knuckle bracket. Byhaving negative camber spec suspension, front grip is improved during cornering, which can improve time on track/circuit driving.

◇For recommended height (F/R -40mm) , it makes -2.3 camber for camber side.
(*1 standard type is -0.6)

◇Height adjustable area (lock nut, spring seat, main body of shock absorber) is manufactured with a special coating for anti-rusting.
